

NUSAFE™

GreenTerraHomes

Light Gage Steel Framing for Homes & Buildings of all types

Phone (800) 640-2471 Fax (888) 419-0827

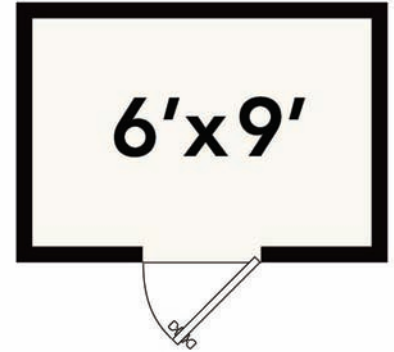

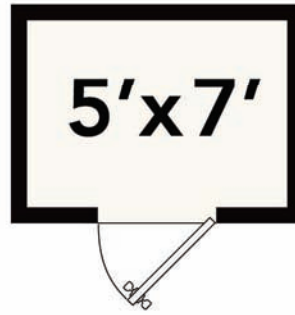

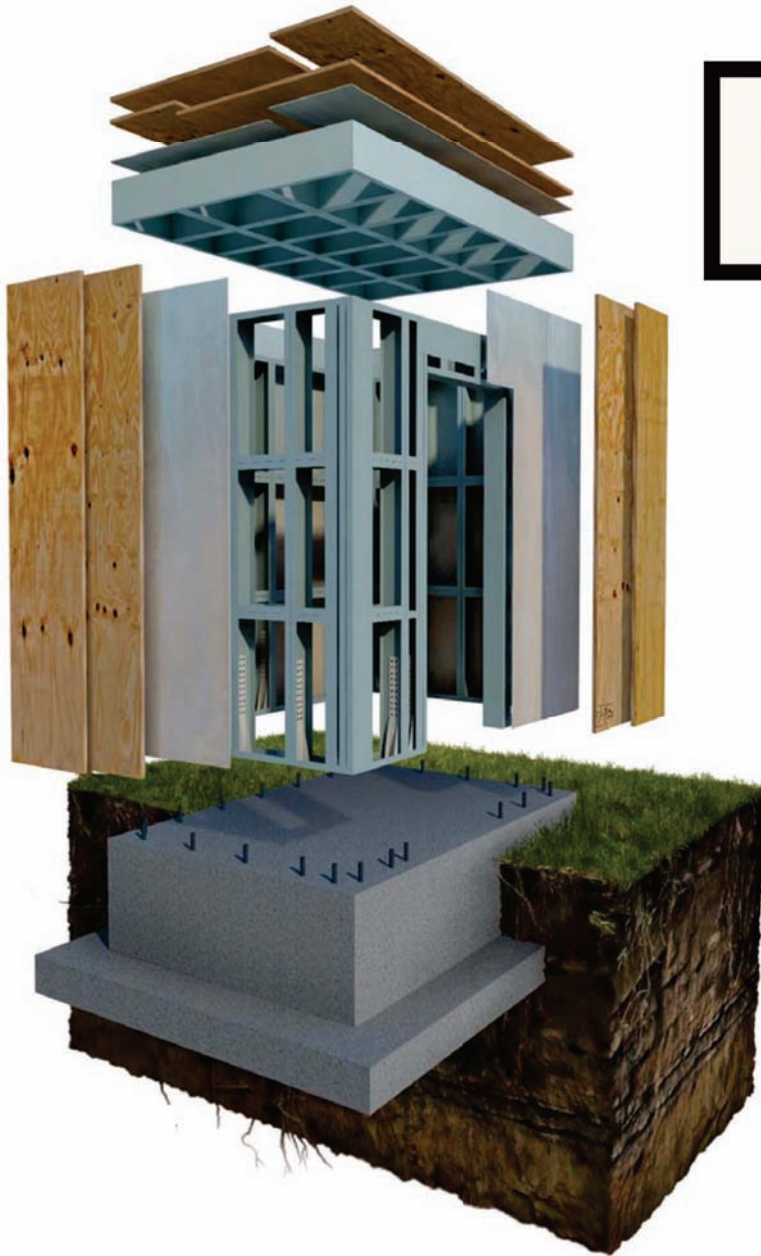

NUSAFE

NSF507 (37.5 SQFT)

- 5 X 7
- Requires Ceco Stormpro 361 door (sold separately)

NSF609 (54.5 SQFT)

- 6 X 9
- Requires Ceco Stormpro 361 door (sold separately)

NUSAFE storm shelter is designed to withstand wind speeds up to 250mph. **NUSAFE** is your solution for keeping family and friends protected during nature's most violent storms. Both of these storm shelters feature

NUSAFE Panel System designed to withstand windborne projectiles up to 150 mph. **NUSAFE** panels have been tested by a nationally recognized Wind Science and Engineering Research Center.

The **NUSAFE** Steel Panel System has proven effective for use in above ground shelter construction as required by FEMA 320 publication "Taking Shelter from the Storm" and FEMA 361 "Design and Construction Guidance for Community Shelters." Matched with the required Ceco Stormpro 361 door (sold separately) **NUSAFE** is a force to be reckoned with.
